# Craft perfect espresso every time with our state-of-the-art automatic distribution technology

SO YOU CAN FOCUS ON CRAFTING UNFORGETTABLE COFFEE EXPERIENCES FOR YOUR GUESTS

## WITH JUST ONE TOUCH

Say goodbye to the guesswork and inconsistency of manual coffee distribution. With a single touch the PUQ PREP Navigator automatically distributes your coffee perfectly, enabling advanced precision, enhancing the quality and flavor of every cup.

## STREAMLINING YOUR WORKFLOW

With its innovative in-line functionality the Navigator integrates grinding with precision distribution into one fluid motion, accelerating your workflow while distributing your grounds for optimal extraction.

## A PATH TO PERFECTION

Discover the groundbreaking technology behind the Navigator, where innovation meets the art of coffee. The Navigator's unique needle configuration embraces randomness to ensure no two paths are the same. This approach disrupts potential channeling before it gets the chance, guaranteeing a full and even extraction with every shot.

The result is a flat bed of coffee grounds in your portafilter, which isn't just a step; it's the foundation for unparalleled espresso shots. This crucial prep stage aligns perfectly with the precision of PUQ PRESS, making sure that when you tamp, it's all about applying the ideal pressure, not correcting the coffee bed.

Embrace the Navigator's path of perfection and elevate your espresso to new heights and consistency.
